IT'S IN THE PRODUCT.**

PAN22 DISC BRAKE TRAILER AXLES

KEY AXLE FEATURES

✓ **Built for the Long Run**

Designed and manufactured by industry experts, AXN axles deliver unsurpassed strength and durability.

✓ **Complete Line of Axle Specifications**

AXN axles are available in a variety of specifications, designed to fit your particular requirements. Special order, non-standard tracks are available to meet your needs.

✓ **Warranty**

AXN axles are backed with a competitive 5-year warranty.*

WABCO ADB BENEFITS

✓ **Advanced Safety & Driver Effectiveness**

Stable braking with virtually no fading, excellent downhill performance.

CSA Scores - No slack adjusters, eliminates out-of-adjustment concerns.

Increased driver comfort - Braking feels more like that of a passenger car.

✓ **Vehicle Efficiency**

Less Downtime - Significantly longer service intervals.

Ease of serviceability - less than half the time to perform a lining change.

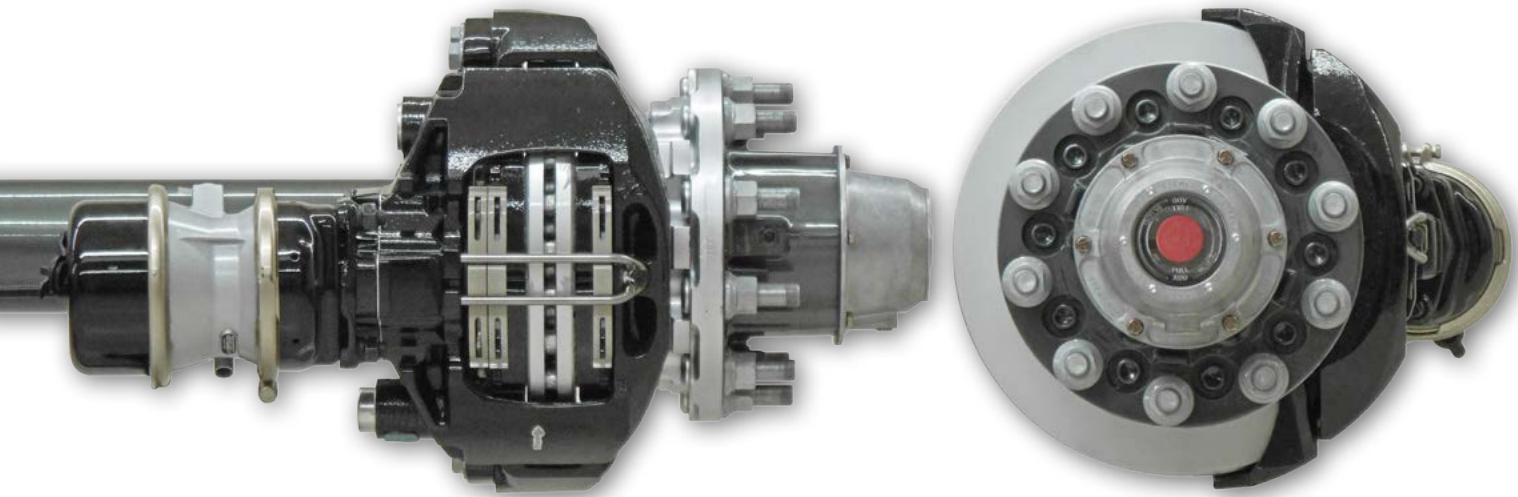

* See AXN Warranty Statement for details.

ADB TRAILER AXLE SPECIFICATIONS

FEATURE	BENEFIT	THE AXN ADVANTAGE
Seamless Beam Tube	No welded seams that affect structural integrity	▶ Light weight with consistent structural properties throughout the beam!
Single-Piece Beam	Consistent material properties throughout	▶ Lighter weight, stronger beam with minimal welding for greater durability. And this includes our extra wide track axles!
Spindle Plug	Internally vented	▶ Reduces need for external venting and risk of ingesting outside contaminants that reduce wheel end life.
Hardened Journals	Hardened bearing and bushing journals	▶ Provides excellent wear resistance, extending the life of your axles further reducing maintenance costs.
Weight	One of the lightest in the industry	▶ Allows you to focus on your business – hauling more payload!
Warranty*	5 years parts/1 year labor	▶ Competitive warranty backed by a responsive team.

* See AXN Warranty Statement for details.

✓ WABCO Pan 22 Proven Single Piston Technology

- ▶ Less than half the moving parts when compared to traditional complex, synchronized dual piston clamping mechanisms
- ▶ WABCO disc brakes benefit from the advantages of patented spreader plate technology, featuring:
 - Single Piston Actuation
 - Reduction of internal part complexity
 - Protection of internal components from thermal risk
