AXN Heavy Duty Announces Launch of eLEG - Electronic Motorized Landing Gear

Commercial vehicle solution provider, AXN Heavy Duty, has announced the launch of its new Electronic Motorized Landing Gear – The eLEG!

AXN's eLEG takes the work out of raising and lowering Landing Gear by the traditional crank method. A simple push of the button raises and lowers the Gear.

AXN's eLEG offers the same great features as their PRO60 model, plus:

- *Easy to understand, two-speed, push-button operation*
- *Robust, low-profile aluminum gearbox casing with MAINTENANCE FREE Power Drive Gearbox*
- *Heavy duty electric motor and state-of-the-art electronics*
- *Independent power supply via maintenance-free battery, includes built-in protections and trickle charger*
- *Manual override capability*

Some of the benefits of eLEG include reduced back strain, improved driver safety, time savings and reduced work-related injuries.

According to John Logan, VP of Sales at AXN, "This is sure to be a popular choice for Fleets and Owner/Operators nationwide."

The eLEG is available to order now in sets. For more information on the eLEG from AXN Heavy Duty, please visit the company website at www.axnheavyduty.com or drop an email to info@axnheavyduty.com.

AXN Heavy Duty, LLC is a privately held, North American-based manufacturer and supplier of undercarriage systems to the heavy duty trucking industry, including truck, trailer and bus vehicle segments for both the OEM production and related aftermarkets.
